I had the same problem. Pull out the filter thing at the bottom and clean out under running water. Check everything is clean. Put it back in making sure there is nothing coming in between the filter and machine. Mine worked after this. There is no Err 60 in the manual. If it works (Err 60 is gone) run a maintenance wash on it - by selecting the hottest temp setting and using liquid detergent if possible ...

Hello - If you are having problems with either not draining or spinning, with your front load washing machine, then you need to realize that they can be interrelated. Mostly in that if your washer is not draining the water it will not spin at all or at least not properly. There also can be others problems that will stop or slow down the spin, but the water not draining is the most common one.
