I need to activate a workbook and worksheet that will already be open. I have code that works for this for the specific name, but the date at the beginning will change every month, so I want code that will use a wildcard for the date and select the workbook and worksheet for activation just using the last part of the name.

Activate Workbook and Worksheet with Wildcard

I am having trouble finding a surefire to copy only visible cells from one worksheet into a new workbook. My initial workbook is filtered. Something along the lines of: Sub RangeToNew() Dim n...

Copy all filtered data from one worksheet into new workbook

I have used the following script to copy multiple workbooks (sheets 1 only) into one master workbook. But, as multiple files are saved in the source folder each day, I now have hundreds of files in my source folder and would like to refine the folders that I copy to the master file.

Excel VBA: Combine multiple workbooks into one workbook ...

I have a workbook created in Excel 2010. I used Data Validation to create a drop-down list in a cell that uses a different column of data for the list of values. I selected "List" in data validation

Excel 2010 Drop-Down disappears when file is saved ...

Security Note: An XML map and its data source information are saved with the workbook, not with a specific worksheet. A malicious user could view this potentially sensitive map information by using a Visual Basic for Applications (VBA) macro. Furthermore, if you save your workbook as a Macro-enabled Excel Open XML Format File, this map information can be viewed through Microsoft Notepad or ...

Delete XML map information from a workbook - Excel

Use Excel's Get & Transform (Power Query) experience to connect to Access databases. You can import tables or queries, and transform your data if needed. Click the Data tab, then Get Data > From Database > From Microsoft Access Database. If you don't see the Get Data button, click New Query > From Database > From Access.
