I currently have one under construction that I have mounted on a small trailer. Some of my friends had wanted to test run their engines and I wanted to be able to take the engine stand to them rather than have them bring the engine to my shop. Of course I had to dress up the trailer a bit. Might look good behind my 55 F100.

THE BEST DAMN ENGINE STAND. THAT MONEY CAN'T BUY . As I stripped the engine of intake, heads, oil pan and water pump... I finally removed enough weight (about 250 #s) to force the stand to let me roll the block over to get the crank out and punch out the pistons... the bare block was just about the max that my old blue stand could endure.

Just followed the picture in the box to put mine together. I also did my own modifications to re-enforce the stand, I will also be adding taller caster to be able to get under test stand with engine hoist. First engine on test stand , I had to put blocks under to be able to get engine hoist under and have enough extension to place engine on stand.

Easy-Run Engine Test Stands are a solution for starting and testing engines before they are installed in a vehicle. Easily test new, used or rebuilt engines, detect leaks, tune, and properly break in camshafts. With the high expense of labor and paint cost, you can detect engine problems before installation in the vehicle, thereby avoiding the potential need to remove and reinstall the engine.
