Eve Online Manual Piloting

Manual piloting is the act of maneuvering a ship without using commands relative to another object, like orbit, keep at range, approach, etc. It is achieved by double left clicking on empty space. Your ship will then orient itself and move in that direction. Your perspective, and thus where you're clicking is affected by the position of your camera, so if you require precision, zoom out as far ...

Manual piloting - UniWiki - Eve University

This works even better if the cruiser pilot times his direction/velocity changes well: for example, as the frigate is moving across the top of the cruiser pilot's screen to the left in his orbit, the cruiser pilot can make a quick right turn and this will make the frigate chase the cruiser -- with low angular velocity -- for a little while.

Advanced piloting techniques - UniWiki - Eve University

Without manual piloting, a frigate can never beat a turret battleship if they start at long range (50km+). The battleship will kill the frigate in between 1 and 3 volleys. With manual piloting, the frigate is massively favored in the engagement. Manual piloting matters less if you are not in a frigate and can survive a hit or three.

Tips for Manual Piloting? - EVE New Citizens Q&A - EVE ...

EVE allows you to discover, explore and dominate an amazing science fiction universe while you fight, trade, form corporations and alliances with other players. ... he added it so that it was clear where and when he was clicking so that you can understand how manual piloting is properly done.

Manual piloting - EVE New Citizens Q&A - EVE Online Forums

I tried (badly) to explain it under basics in the blogpost. I believe there's a dome around our ship. When you double-click in space, you really click somewhere on that dome and your ship will head in direction of where you clicked on the dome.
