Pneumatics (From Greek: πνεύμα) is a branch of engineering that makes use of gas or pressurized air. Pneumatic systems used in industry are commonly powered by compressed air or compressed inert gases. A centrally located and electrically powered compressor powers cylinders, air motors, and other pneumatic devices.

### **Pneumatics - Wikipedia**

Pneumatics is a branch of mechanics that deals with the mechanical properties of gases. To understand the process, consider some common examples of pneumatics in everyday life. It works with the study of pressurized gas that produces mechanical motion, and the application of such gases to produce motion.
