Engineering Peer Review Procedures

In engineering, technical peer review is a type of engineering review. Technical peer reviews are a well defined review process for finding and fixing defects, conducted by a team of peers with assigned roles. Technical peer reviews are carried out by peers representing areas of life cycle affected by material being reviewed (usually limited to 6 or fewer people).

The basic steps in the peer-review process have been around for a while. In fact, a medical journal published in the 1700s alerted contributors that all submissions would be "distributed according to the subject matter to those members who are most versed in these matters" [source: Ware]. This time-honored tradition continues today, although it's not as simple as it sounds.
