Page 2 of 9 - F1 manual gearbox operation circa 1991 - posted in The Technical Forum Archive: Sure, the best manual change is probably better and more crucial than the best auto change. Or at least equal. But, over 80 laps, with N000 changes, the reliability and consistency of the auto change is obviously a big plus.

**F1 manual gearbox operation circa 1991 - Page 2 - The ...**

The reason why they don't use Automatic transmission is that it is along the lines of automatic driving. F1, as a sport, tests the driver's capabilities as well as the team's ability to make enduring and fast cars. Automatic Transmission would make the sport less interesting as it would require nothing from the driver.

**Why don't F1 cars use automatic transmission to shift ...**

Electrohydraulic manual transmission is a type of semi-automatic transmission system, which uses an automated clutch unlike conventional manual transmissions where the driver operates the clutch. The clutch is controlled by electronic computers and hydraulics. To change gears, the driver selects the desired gear with the transmission shift lever, and the system automatically operates the ...

**F1 TIPS: Learning Manual Gears**

A sequential manual transmission (or sequential manual gearbox) is a non-traditional type of manual transmission used on motorcycles and high-performance cars for auto racing, where gears are selected in order, and direct access to specific gears is not possible.. With traditional manual transmissions, the driver can move from gear to gear, by moving the gear lever to the appropriate position.

**Sequential manual transmission - Wikipedia**

In order to remain faithful to the original F1, the car will feature a naturally aspirated V12 engine hooked up to a manual gearbox. Rather than adopting the iStream chassis design serving as the core of IGM's entry-level performance car, the new F1 tribute will rely on a carbon monocoque.

The reference to a "1939 transmission" is a catch-all phrase these days. It initially refers to the last year of the top-load shifter style, but it also referred to the change over to an improved gear and synchronizer set. Ford started this process in 1939 but not all vehicles received the newer gear set until about 1941.
