Free Economics Case Study | CaseStudyHub.com

Engineering Economics . The essential idea behind engineering economics is that money generates money. You cannot compare \$10.00 today to \$10.00 a year from now without adjusting for the investment potential. A simple example would be to take the \$10.00 and put it in a savings account at 2% interests. After a year you have \$10.20 instead of \$10.00.

Engineering Economics - Louisiana Tech University

Economic studies, which are much more common outside of engineering economics, are still used from time to time to determine feasibility and utility of certain projects. They do not, however, truly reflect the "common notion" of economic studies, which is fixated upon macroeconomics, something engineers have little interaction with.

Engineering economics - Wikipedia

These case studies are not selected or reviewed by IISE staff or volunteers. They are provided by advertisers as a way to share information with industrial engineers, managers, and other professionals involved in enhancing productivity, improving quality, and increasing efficiency.
