Essentials Of Human Diseases And

A disease is a particular abnormal condition that negatively affects the structure or function of part or all of an organism, and that is not due to any external injury. Diseases are often construed as medical conditions that are associated with specific symptoms and signs. A disease may be caused by external factors such as pathogens or by internal dysfunctions.

In a subsequent publication, Bohan et al noted that cutaneous disease may precede the development of the myopathy in patients with dermatomyositis. [] In addition, the existence of another subset of patients with dermatomyositis that affects only the skin (ie, amyopathic dermatomyositis [ADM], or dermatomyositis sine myositis) has been recognized.
