N52 engines have a three-stage variable-length intake runners. Low end torque and high end power are improved by varying the intake runner length according to a map stored in the engine control module (ECM). Engine vacuum, load and ambient temperature are used by the ECM to determine the rpm at which to switch the intake manifold configuration.

Where the N52 engine truly shines is when passing on the highway. Punching the accelerator at 60 MPH gives a surprise boost of power for getting around slower traffic, and the brakes are extremely soft and keep the car under control when needed. But the biggest surprise gift from the E60 N52 engine has been the gas millage.
