peugeot 206 ecu | eBay

This water damaged ECU is a very common failure for Peugeot 207 & 206 vehicles built between
2005 and 2011, the common issue is coolant contamination into the wiring harness that travels via
'capillary action' up to the plug of the ECU, once the water from the coolant system reaches the
ECU it causes the ECU terminals to corrode causing open circuits for various sensors and actuators,
this results in host of running problems for the engine.
