The Feldstein-Horioka puzzle of international finance refers to the concept that savings and investment are highly correlated at the country level. In the absence of transaction costs and other frictions, savings and investment shouldn't correlate at the country level for a small country. This prediction implies that, assuming no restrictions between countries, capital should flow [...]

The Feldstein-Horioka International Finance Puzzle - dummies

In general these puzzles are solvable. 2. An not solvable puzzle can be made solvable, if you swap two neighbor fields at the beginning. So one possibility is to try to solve the puzzle and in parallel try to solve the puzzle with one neighbor pair fields swapped. If a solution on the modified version is found, the original puzzle was not solvable.

What is 8 puzzle? The 8 puzzle is a simple game which consists of eight sliding tiles, numbered by digits from 1 to 8, placed in a 3x3 squared board of nine cells. One of the cells is always empty, and any adjacent (horizontally and vertically) tile can be moved into the empty cell.

8 Puzzle Problem, Algorithm, C++ Source Code, Download

Late answer, I know, but I'm expanding on Hagen von Eitzen's answer in a slightly more elementary way, if it's still of interest. Short answer: This state is not solvable. First note that every permutation can be represented as a graph of disjoint cycles (see cycle notation). In the usual way, then, we represent a game state as a permutation of the 8 non-blank tiles, flattened to row major order.

How to check if a 8-puzzle is solvable? - Stack Exchange

Jumble is a word puzzle which is played by scrambling the letters to make an anagram, based on some clue. Jumble Solver is a simple, fast and easy to use jumble word solver. You enter the jumbled/scrambled words and it tells you the possible words or answers, that can be made from those letters (think of it like a single word anagram).
