Induction problems Induction problems can be hard to find. Most texts only have a small number,
not enough to give a student good practice at the method. Here are a collection of statements
which can be proved by induction. Some are easy. A few are quite difficult. The difficult ones are
marked with an asterisk.

electromagnetic induction is to understand the idea of magnetic flux. Flux is a general term
associated with a FIELD that is bound by a certain AREA. So MAGNETIC FLUX is any AREA that has a
MAGNETIC FIELD passing through it. A B We generally define an AREA vector as one that is
perpendicular to the surface of the material.
