Answers and Solutions: 3 - 1 Chapter 3 Analysis of Financial Statements. ANSWERS TO END-OF-CHAPTER QUESTIONS 3-1 a. A liquidity ratio is a ratio that shows the relationship of a firm's cash and other current assets to its current liabilities. The current ratio is found by dividing current assets by current liabilities.

Chapter 3 Analysis of Financial Statements

Liquidity and Solvency Position: Current Ratio is 2.9. It means current assets of Rs.2.90 are available against each rupee of current liability. The position is satisfactory on the basis of current ratio. However, the Liquid Ratio is 0.65: 1. It means greater part of current assets constitute stock; the stock is slow-moving. Therefore, the liquidity position is not satisfactory.

Ratio Analysis: Problems and Solutions | Accounting

Exercise :: Ratio and Proportion - General Questions. In a mixture 60 litres, the ratio of milk and water $2 : 1$. Quantity of milk = $60 \times \frac{2}{3}$ litres = 40 litres. Quantity of water in it = $(60 - 40)$ litres = 20 litres. Let quantity of water to be added further be x litres. Then, milk : water = $40 : (20 + x)$. Quantity of water to be added = 60 litres.
