The operation is very computational intensive as it requires the MDEX

Oracle Endeca Common Performance Problems | Mandar Shinde

Yesterday, I kicked-off our Endeca week with an overview of Endeca's product line prior to the recent acquisition by Oracle, looking at Endeca's two main products: Endeca Infront, which powers the "faceted" search feature behind many e-commerce sites, and Endeca Latitude, an "agile" BI tool

designed to create web-based applications against the Endeca MDEX engine, which also powers Infront.

Oracle Endeca Week : What is the Endeca MDEX Engine?

AdityaKar's point on threading is valid, although it is hard to imagine a server build with 24Gb RAM but only a single quad core processor. I'd suggest reading the Performance Tuning Guide, then setting up a load test and running the MDEX Request Analyzer afterwards - that will give you a clearer picture with min/max/average engine time, min/max/average response time, details on any queuing ...
